## Product description:

- specialized device for drying and testing DPF / FAP / CAT filters
- uses the force of the air flow from the side channel blower,
- and high temperature of compressed air
- thanks to the electronic manometer, it is ideally suited as a measuring device

## Intended use :

- DPF / FAP / CAT filters
- passenger cars and vans up to 3.5 T

## Functions :

- testing
- drying

## Technical parameters – DPF System:

- **400 V supply voltage:**  
air blower 3 KW  
air flow max 219m<sup>3</sup>/h  
pressure max 350 mbar
- **control panel :** manual
- **back pressure test before and after cleaning ( mbar ):**
- **printing cleaning efficiency reports:**  
online report generator (partner zone)
- **drying system :**  
side channel blower
- **parameters of the cooperating compressor:** up to 10 bar (not included)
- **installation of a diesel particulate filter – passenger car:** pneumatic quick coupler
- **type of material used:** stainless sand black steel

## The DPF System set contains:

- DPF System machine
- set of connection adapters for particulate filters (cars and vans)
- endoscope – mini USB inspection camera
- specialist pen for steel filter housing
- training

## Set price and financial settlement:

- **Net price: 3.800 GBP (only for EU valid VAT number)**
- **I payment** in the amount of 1.200 GBP, payable up to 7 days from the date of order
- **II payment** in the amount of 2.600 GBP, payable at the latest on delivery of the goods
